Pneumatic/Hydraulic Test Pumps

The New Fluke 730 series portable pressure hand pumps feature fast pressure generation, precise control and ease-of-use. These pumps are optimized for pressure stability and consistency during calibration. The high quality design helps to prevent common pressure problems such as plugging, leaking and laborious operation.

Coupled with the Fluke 730G Digital Pressure Calibrator, this complete pressure solution provides an efficient and accurate measurement and calibration of pressure gauges, switches, transmitters, making it ideal for metrology laboratories and industries to use them indoor or outdoor.

Fluke-730LTP/40K

- Pressure range -40 kPa to 40 kPa
- Ultra-fine precision adjustment to support low pressure calibration
- Special insulation to reduce the influence of external temperature environment

Fluke-730LTP/600K

- Pressure range -95kPa to 600kPa
- Pressure is generated by the combination of the pressure rod and screw for faster and smoother pressure increase and decrease
- Safely switch between pressure and vacuum

Fluke-730PTP/10M

- Pressure range -95 kPa to 10 MPa
- Multi-stage boost system design makes the process 5 times more efficient.
- Safety lock ensures safe switching between positive and negative pressure

Fluke-730HTP/70M

- Pressure range 0 kPa to 70 MPa
- The screw press design supports high pressure range with less effort.
- Fine pressure adjustment capability with shut-off valve for stable measurements.
